“We understand how important this decision is to you.

We are here to help you every step of the way”

Some things to consider before making your choice:-

Regulations

Churchyards and cemeteries have regulations which govern the size of memorials as well as the materials and designs. Please do speak to us for advice on specific regulations of your cemetery.

Materials

This brochure gives examples of granite, marble and other natural stones. Each of these materials has individual characteristics which are important to know before making your choice. For example; Granite will weather better over time than sandstone, marble may stain easily especially in certain circumstances, some granite's are more porous than others and will become darker when wet etc. We can offer guidance on all of these materials and their suitability to your needs.

Lettering

You will see different examples of lettering as you read through the pages. The use of gold leaf on the inscription is common, however, painted letters, raised bronze letters and flush lead may also be considered in certain situations. Again our expert advice will ensure that you are fully informed on the choices available to you.

Maintenance

Understanding the maintenance requirements of different materials may help you make the right choice at the beginning of the process as well as ensuring that your memorial stays in the best possible condition over the coming years. Please do ask us about this aspect of your memorial.

Your needs are as unique as the person's life you are commemorating. Our expert advice and guidance will help you make the choices that are right for you.
